FROM THE OUTSIDE IN

Lanz machine applies finishes for consistency and efficiency. Our state-of-the-art equipment uses an environmentally friendly process; recycling unused material and reducing waste.

We choose stains and finishes that protect your cabinets and enrich the grain and color of the wood, and we build our commitment to superior quality and durability with the best selection of wood.

We've attempted to reproduce our stain colors as closely as possible. However, slight discrepancies may occur due to printing limitations and variations in wood grain and pattern.
