GRANITE

Lanz granite countertops provide a rich, natural, beautiful, and long-lasting surface for kitchens and bathrooms.

One of the most heat-resistant countertop materials, granite has a luminous, dimensional quality, for timeless, stunning appeal.

Metamorphically formed, granite is an igneous rock containing interlocking mineral crystals of feldspar, mica and quartz. These naturally occurring, hard minerals provide a scratch-resistant, durable surface with natural patterning to stand the test of time.

Lanz Cabinets offers quartz and granite countertops, in addition, to cabinets to add ease to your building project.

Lanz countertops provide durable and sustainable surface solutions for kitchens and bathrooms for multifamily housing.

Lanz Cabinets is an importer of prefabricated, cut to size, granite and engineered quartz for the multi-family industry.

Our suppliers are located in Southeast Asia. Quartz is imported from a tariff-free location.

A 50% deposit of purchased material is required to begin countertop fabrication. The balance, including all freight costs, is due Net 10 days after proof of arrival at a US port. Installation and all related installation materials (sub-deck, support brackets) are invoiced based on progress.

Material approval, approved shop drawings (prior to framing), and deposit must be received a minimum of 20-22 weeks before expected on-site delivery.

Rev A redlined cabinet drawings must be received prior to beginning countertop drawings (minimum 26 weeks before countertop onsite date).

Freight time frames

(includes customs clearance):

- supplier to US port – 60-90 days

Combining cabinet and countertop scopes with Lanz streamlines contracting, reduces layout errors, and can shorten countertop durations.

Upon request, we can provide undermount pressed and man-made kitchen and ceramic bathroom sinks. Contact your salesperson for additional information.
