

VALUE

Our twelve standard stain/finish options are available on Alder, Beech and Oak hardwoods and veneers.

HARDWOODS AND VENEERS

Medora Apartments, Seattle, WA
Euro-Pacific collection upper doors with frosted plexiglass recessed panels, Cityscapes collection base veneer doors, both in Beech hardwood Cafe finish, flush overlay frameless with, satin nickel Bar pulls

Lanz waterborne UV clear finish coat and water-based UV stains (dispersions) protect your cabinets and enrich the grain and color of the wood.

Our clear finishes combine UV curing for a quick, quality finish that resists abrasion, impacts, and chemical spills to stand the test of time. Our stains are water-based and UV stable. Containing no reportable VHAPs, our formaldehyde-free formulas are machine spray applied to eliminate over spray thus, keeping pollutants out of the air.

VALUE HARDWOOD FINISHES

BEECH

Beech is known for its strength, affordability, density, high shock resistance, tight grain, even texture, and ability to take stains well.

Finish samples presented here are subject to change due to availability. Lanz Cabinets makes no guarantee that these materials will continue to be in production. If a material is discontinued, we will make every effort to find a suitable replacement. We use only quality hardwoods and hardwood veneers. We strive to provide a finish as consistent as these natural woods and wood veneers allow. Like all natural products, wood exhibits a great deal of variation; therefore, the appearance of the finished product may differ due to these variations in grain and other natural hardwood features. These differences may be more noticeable when in a raw state or with a UV natural finish. Hardwoods are also photo-reactive materials, which are affected by ultraviolet rays, so perfect color matches cannot be guaranteed when additional items are purchased subsequent to the original order. These natural wood characteristics are beyond our control, and for that reason, product variation due to wood color, grain, and other natural differences is not the responsibility of Lanz Cabinets.

VALUE HARDWOOD FINISHES

ALDER

Alder is evenly textured with small pores and a subdued grain pattern. Because of the relative softness of Alder veneer, it is not offered as a flat panel/slab style door.

VALUE HARDWOOD FINISHES

OAK

Oak is tried and true. One of the hardest woods available, it has distinctive grain and texture. Oak is a great choice for durability and high use areas.

PREMIUM

HARDWOODS AND VENEERS

Maple, Cherry, and Walnut are available in our natural clear finish that allows the natural color, grain, and character of the wood show through.

Our natural clear finish coat on all offered species allows the natural color, grain, and character of the wood show through while protecting your cabinets.

When choosing paint-grade cabinets (unfinished, painted on site by others), they will be constructed from Maple hardwood.

Multifamily Solutions

MAPLE *

CHERRY *

WALNUT *

* Available only in Natural finish

Maple hardwood is light with an even grain pattern and impressive durability that is incredibly strong,

Cherry is perhaps the most prized furniture hardwood in the US. Cherry is smooth grained with reddish-brown hues that darkens as it ages.

Walnut is known as one of the most hard, dense, and shock-resistant hardwoods. Walnut features a rich brown color with a beautiful sheen.

Our clear finishes combine UV curing for a quick, quality finish that resists abrasion, impacts, and chemical spills to stand the test of time. Containing no reportable VHAPs, our formaldehyde-free formulas are machine spray applied to eliminate over spray thus, keeping pollutants out of the air.
