QUARTZ

Lanz quartz countertops are one of the most durable and sustainable surfaces for kitchens and bathrooms.

Quartz is one of the hardest known minerals and when combined with very small amounts of polyester resins to bind it, the resins add color, make it non porous, (thus never requiring a sealer) and stain and scratch resistant.

Style offerings range from sophisticated solids to playful patterns. Recycled glass, metallic flecks, swirls, veining and random patterning open a wide range of aesthetic opportunities to meet design trends.

QUARTZ PERFORMANCE

Cascade White

PROPERTY	QUARTZ	GRANITE	MARBLE
NON POROUS	YES	—	—
